WORLD CATALOG OF MEDICAL LITERATURE

A few years ago the Army Medical Library elaborated a project establishing a bibliographical center in the library and collecting holdings of other libraries with the final purpose of having a very exhaustive World List of the Medical Literature. This World List, in a card catalog form, will also include the location of the rarer publications.

The project started with microfilming the holdings of the District of Columbia Libraries. It will eventually be extended to all important public and private libraries of the Western Hemisphere, and Europe.

At present, though the project is still at its beginning, the Army Medical Library wishes to give aid to those who are searching for rare publications. The procedure is to write to the Index-Catalogue Division of the Army Medical Library and to inquire whether a certain publication is obtainable in this country.

It may be feasible to publish short notices as to the whereabouts of rare volumes. The Current List publishes the recent acquisitions of the Army Medical Library. On the inside covers of this supplement, a column of Queries and Answers could be initiated, containing material of bibliographical requests.

CFM.

The following publications are desired by Dr. Walter Landauer of Storrs Agricultural Experiment Station, Storrs, Connecticut. The records of the Army Medical Library fail to show that they are in any American library.

It is hoped that anyone having any information in regard to the location of these publications will communicate with Dr. Landauer:

BONNEMAIN. Observations sur l'art de faire éclore et élever la volaille sans le secours des poules. Paris, 1816.

PALMIERI, G. Tentativo d'una biografia di G.B. della Porta, e d'un esposizione della sua magia naturale. Salerno, 1871.

COPINEAU. L'homme rival de la nature. Paris, 1795.

— Neue oekonomische Nachrichten der patriotischen Gesellschaft Schlesien, vol. 2, 1781.

CURRENT LIST OF MEDICAL LITERATURE is published weekly and lists of RECENT BOOK ACQUISITIONS are issued several times per year as supplements. The subscription price for both is \$5.00 per year in the United States and \$5.50 per year in other countries. The Recent Book Acquisitions may be obtained separately at \$1.00 per year.
